

# ENSURE YOUR ROAD WARRIORS HAVE **PROACTIVE** ASSISTANCE

DYNAMIQ'S TRAVEL RISK MANAGEMENT SOLUTION, PROACT ENSURES YOUR PEOPLE ARE WELL PREPARED FOR THE RISKS & PROVIDES THE QUICKEST POSSIBLE RESPONSE IN AN INCIDENT.

If your people face a medical or security incident while overseas, you want to know they get the best possible care in the shortest amount of time.

Dynamiq's travel risk management solution, PROACT ensures your people are well prepared for the risks and provides the quickest possible response in an incident.

Some assistance companies will only retrieve your people if they can get to a certain point for pick up.

Dynamiq goes where others won't.

We use our global network of more than 75,000 Dynamiq-accredited service providers, including transport and logistics companies, hospitals, medical centres, air ambulance providers and air charter companies, to get to your people to safety in the quickest possible time.

## HOW DOES PROACT HELP YOU MEET YOUR DUTY OF CARE OBLIGATION?

### ORGANISATIONAL RESILIENCE

We help you implement organisational resilience programs that will enable you to effectively assess, plan, respond to and recover from any incident affecting your people, assets or reputation.

### TRAINING

Travel safety webinars prepare your people for the risks they might face while travelling, thereby reducing the chance of preventable incidents occurring.

### ADVICE AND ASSISTANCE

Providing your people with advice, prior to and when they're overseas, helps to prevent minor medical or security issues from getting out of hand. If an incident does occur, our 24/7 Emergency Operations Centre will swing into action and get your people home.

### TRAVEL ALERTS AND INFORMATION

Dynamiq's Riskline country information portal, intelligence reports and alerts inform your people about the medical and security risks and general information on the country they're travelling to. Trip Tracking ensures you can locate and communicate to your people if you need to.

### COMMUNICATIONS PROTOCOL

Communication protocols ensure our Emergency Operations Centre staff can contact your business decision makers immediately in time-critical situations. This provides invaluable oversight into all potential incidents, empowering you to quickly respond.

## WHY IS PROACT MORE COST EFFECTIVE?

It's simple, we've disrupted the travel risk management sector by providing a better, cheaper service. As we don't own expensive assets, such as fleets of planes which often sit around unused, we have less overheads so we pass the savings onto our clients.

Contact us to find out more about a cost effective way to meet your Duty of Care obligations to your travelling workforce.
