

TRAVELSAFE

PROTECTING

YOUR

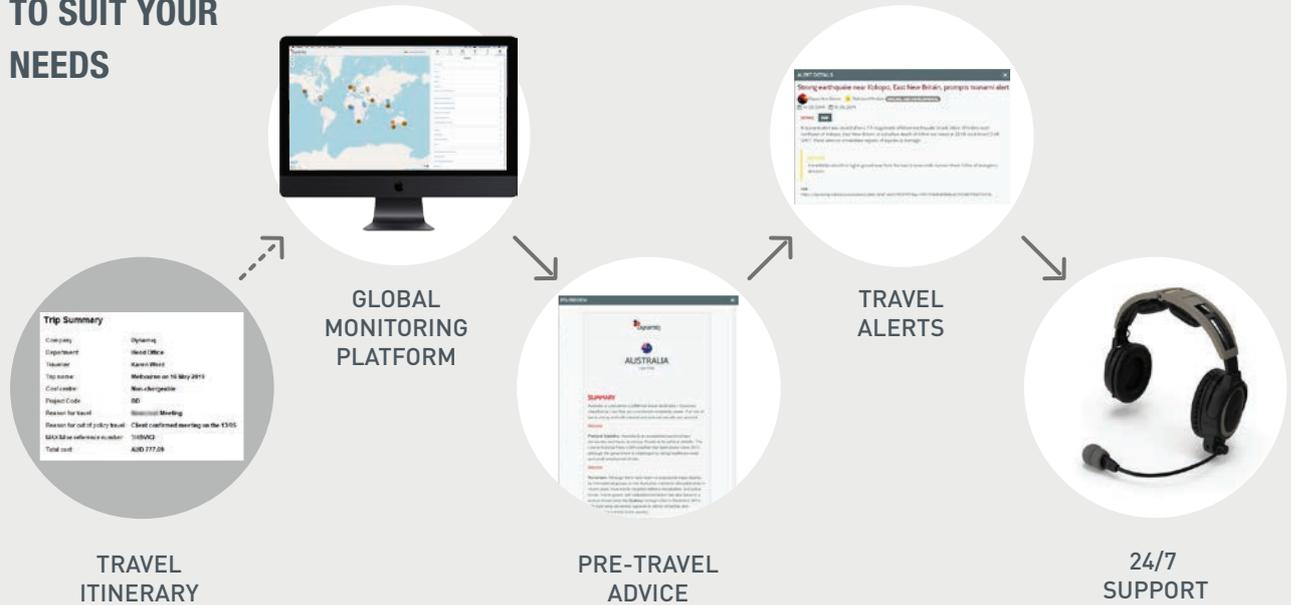

MOBILE

WORKERS

When your people are travelling for work, they need to be aware of the risks in their country of travel. If an incident occurs, you need to be able to quickly locate them and provide help if required.

Dynamiq's in-country expertise and Global Alerting Platform, backed up by our 24/7 Accredited Monitoring Centre, ensure your people are adequately supported on their journey.

A SOLUTION TO SUIT YOUR NEEDS

HOW WE CAN HELP PROTECT YOUR MOBILE WORKFORCE

- **PREPARATION** - When the traveller makes a booking they receive pre-travel advisories, with up-to-date destination information and risk analysis.
- **ITINERARY BASED TRAVEL TRACKING** - Itineraries are manually uploaded or automatically imported from your travel management company, enabling you to quickly locate and communicate with your travellers.
- **TRAVEL ALERTS** - While overseas, country-specific alerts, warnings and notifications are sent to the traveller via email and SMS.
- **REAL-TIME TRAVEL TRACKING** - Depending on your level of risk, you can deploy additional tracking solutions such as our mobile app, satellite devices or discreet wearable devices.
- **COMMUNICATION** - Alerts and notices can be pushed to travellers via voice, SMS or email. When the app or satellite devices are utilised, messages can also be sent to travellers as a broadcast or you can issue ring-fenced messages to travellers in a certain location.
- **24/7 SUPPORT** - Our Accredited Monitoring Centre will reach out to your travellers if they're in the vicinity of a serious incident or require help.

SUPPORTING YOUR SUCCESS

Whether your people are heading to Melbourne or Madrid, Dynamiq will ensure they're supported throughout their journey. Contact us to find out more.
